

ANTI-SPAM POLICY

ITS Telecommunications Systems, Inc.'s Unsolicited Bulk E-Mail Policy:

ITS Telecommunications Systems, Inc. specifically does not authorize the use of its proprietary computers, servers, routers and computer network ("ITS") to accept, transmit or distribute unsolicited bulk e-mail sent from the Internet to ITS subscribers (or to others). It is also a violation of ITS policy, and the law, to send or cause to be sent to, or through, the ITS network e-mail that makes use of or contains invalid or forged headers, invalid or non-existent domain names or other means of deceptive addressing. ITS considers such e-mail to be unlawful and a violation of our policy, and any attempt to send or cause such e-mail to be sent to, or through, the ITS network is unauthorized. Moreover, any e-mail relayed from a third party's mail servers without the permission of that third party, or any e-mail that hides or obscures, or attempts to hide or obscure, the source of an e-mail also constitutes an unauthorized use of the ITS network. E-mail sent or caused to be sent to the ITS network that violates your agreement with ITS is also unauthorized. Nor does ITS authorize the harvesting or collection of screen names from ITS Online service for the purpose of sending unsolicited e-mail. Any such action also constitutes violation of ITS policy.

Limitations on Sending E-Mail

ITS reserves the right to investigate and shut down the e-mail account of any Customer who has sent e-mails to more than 50 recipients at any one time.

ITS reserves the right to take all legal and technical steps available to prevent unsolicited bulk e-mail or other unauthorized e-mail from entering, utilizing or remaining within the ITS network. Such action may include, without limitation, the use of filters or other network devices, immediate termination of ITS service, and prosecution of offenders through criminal or civil proceedings. Nothing in this policy shall be construed to grant any right to transmit or send e-mail to, or through, the ITS network, and in no event shall any failure by ITS to enforce this policy constitute a waiver of ITS' rights.

Unauthorized use of the ITS network in connection with the transmission of unsolicited bulk e-mail, including the transmission of counterfeit e-mail, may result in civil and criminal penalties against the sender, including those provided by the Computer Fraud and Abuse Act (18U.S.C. § 1030 et seq.); and various state laws.
